

**NASA Ames ACES RFP  
Solicitation #NNA090248332R- AMR  
Questions and Answers  
Set One  
February 10, 2009**

1. Reference page L-14, section L12.2(c) Relevant Contracts are described and a limit of 5 relevant contracts are called out; except in "section L13.2.3". This section no longer exists.

The incorrect section "L.13.2.3" was listed on page L-14 in section L12.2(c). The correct section is L12.2.3 and will be corrected in Amendment 3.

2. In section L.12.2.3, no minimum or maximum number of required contracts are listed. This section appears to conflict with section L12.2(c) which limits the number of relevant contracts to 5.  
Are you looking for 5 relevant contracts, or as many relevant contracts as we can list?

In Section L.12.2.3 there is no minimum; however, there is a maximum of 10 contracts (5 relevant contracts and 5 additional contracts). Please see amendment 3 of the RFP.

3. In section L 12.2.4 Submission of Reference Information, sub paragraph (b) calls out 5 contracts; subparagraph (c) calls out "two other relevant Government Contracts and two from relevant commercial contracts" for each offerer and major subcontractor. This implies that you are looking for a total of nine relevant contracts from each offerer and major subcontractor.  
For an offerer with two major subcontractor's, this number grows exponentially from 9 relevant contracts to 27 relevant contracts.  
Is there a maximum number of questionnaires you are looking for?

We are looking for 9 relevant contracts from each offeror and major subcontractor. The maximum number of questionnaires is dependent on how many major subcontractors each offeror has.

4. Please clarify the first bullet of H.14(c)(2)?

The first bullet of H.14(c)(2) has been replaced and updated on Amendment 3. See Amendment 3 for the clarified language.
